

ISACA Germany: Member discount for AAISM database | New white paper on threat modelling | Events, Seminars

Dear All,

in our last newsletter, we already informed you about ISACA's new 'Advanced in AI Security Management (AAISM)' certification. To mark the launch, the umbrella organisation is offering a special deal **until the end of October 2025**.

ISACA members receive an additional **20% discount** on the member price of the **Questions, Answers and Explanations Database (QAE)** with the discount code **CHAPThankYouAAISM**.

Further information on the certification can be found on the [AAISM™—AI Security Management™ | ISACA website](#).

New Whitepaper: Threat Modeling Revisited

In its newly published white paper ***Threat Modelling Revisited***, ISACA shows how threat modelling helps companies identify and assess cyber risks at an early stage and develop appropriate countermeasures. The method helps to prevent security breaches while securing business success and market position.

Our interim president, Julia Hermann, contributed to the white paper.

The white paper is particularly relevant for executives, CISOs and information security teams.

You can find the **download** link [here](#) on the umbrella organisation's website.
